

Energy Market Solutions

Power your workflow with an end-to-end solution that boosts your insights and decision making with energy-specific market intelligence. Improve your performance and strategy in the energy space with FactSet’s integrated solution.

LEVERAGE ASSET LEVEL DATA & EXPERT ANALYSIS ON THE ENERGY MARKETS

FactSet’s Energy Market solution, BTU Analytics, provides clear and meaningful answers to the most complex oil, natural gas, and power generation market questions.

Oil & Gas Market Coverage:

- Comprehensive five-year outlook of the fundamentals driving the upstream, midstream, and downstream markets
- Supply/Demand and regional flow dynamics with price forecasting for 27 natural gas basis markets and 10 key oil differentials
- Well-level production and breakeven economics with access to the assumptions driving the models used by the experts doing the analysis
- Analysis of remaining drilling inventory estimates by breakeven to quickly indicate the most advantaged operators and acreage within any given play

Power Market Coverage:

- Project news and information, generation queues, vetted plant retirements, historic LMPs, hourly generation, substation, and transmission data for all US ISO regions
- Risked three-year forecast of power generation build-out by fuel type for the U.S. market
- Asset-level analysis for renewable and thermal plants highlights emerging risks and development opportunities
- Insight into the risk behind power projects in development with FactSet's proprietary grading system that combines more than 300 data sources

DISCOVER EXTENSIVE PUBLIC AND PRIVATE COMPANY DATA

Analyze tens of thousands of public companies and millions of private companies worldwide with more than 3,000 data items and over 950 industry-specific metrics.

- Track M&A activity and associated securities for sources of capital
- Leverage FactSet’s robust universe of private companies and data, including private energy corporates, to uncover investment opportunities, ESG performance, and industry tracking
- Run pro forma M&A analysis across geographic revenues, supply chains, and business lines
- Monitor fundraising and investment activity for more than 24,000 PE/VC firms

TRACK DETAILED INDUSTRY AND PRODUCT SEGMENT ESTIMATES

Access more than 450 consensus- and detail-level estimates and statistics from leading investment banks and research firms.

- Leverage more than 1,200 contributing brokers covering over 19,000 global companies
- Compare KPIs against your competitors using industry-specific metrics and business segments

ACCESS INSIGHTFUL, REAL-TIME COMPANY NEWS AND SMART SEARCH

Gain instant access to crucial intelligence for the evolving energy industry using StreetAccount’s real-time intelligible news summaries, previews, recaps, and post-analyst commentary.

- Easily search for keywords and phrases such as “Permian oil growth” or “U.S. Energy Transition” across news stories, filings, research reports, and earnings transcripts
- Analyze the impact of ESG goals on energy companies and assets with BTU Analytics’ Energy Market Commentary

UNDERSTAND YOUR SHAREHOLDERS WITH IN-DEPTH OWNERSHIP ANALYSIS

Obtain a holistic view of shareholder ownership and positions in your peers with highly visual, data-rich reports.

- Review position changes, recent activism, and general trends overtime in the energy industry
- Quickly screen for comparable contacts to accurately target investors
- Acquire valuable insights into your shareholder’s strategy and drive meaningful conversations with FactSet’s ownership data
