

# Metals & Mining Industry Solutions

Power your workflow with an end-to-end solution that provides detailed mining-specific data and sweeping industry coverage.

## LEVERAGE EXTENSIVE MINING PROPERTY-LEVEL DATA

Analyze the asset base of a given mining or exploration company by using comprehensive mining-specific data and metrics.

- Gain insight on assets across the mining lifecycle ranging from early-stage prospects and exploration targets to fully-operational mines
- Access metrics by metal for each property, including detailed reserves and resources broken out by tonnage, grade contained, and production and costs for producing assets
- View Life of Mine (LOM) data for advanced properties extracted from mining technical reports based on comprehensive geologic and engineering work required to estimate and forecast mining and processing parameters, capital requirements, detailed mine plans, production and operating costs, and other economic parameters
- Compare and contrast mining properties by evaluating the quantity and quality of their mineral assets, historical production, cost performance, and LOM parameters
- Analyze technical reports labeled by property name and discover underlying assets of a given mining or exploration company

## UTILIZE CORPORATE-LEVEL MINING INDUSTRY METRICS

Conduct research and analysis on mining and exploration companies utilizing aggregated and attributable corporate-level industry metrics.

- Tap into key mining industry metrics, including detailed reserves and resources and production and costs sourced from quarterly and annual reports and filings
- Perform mineral reserve replacement analysis and review the evolution of a company's asset base and its historical ability to grow and replace depleting reserves and resources
- Track the operating performance of mining companies by examining how their production and cost base has changed over time
- View forecasts and estimates on mining operational metrics from leading mining-focused research firms and investment banks

TRACK COMMODITY PRICES & CONSENSUS FORECASTS

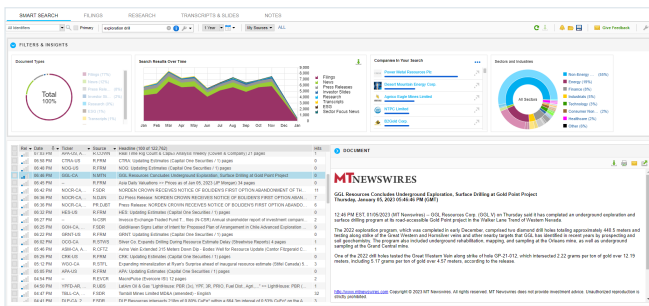

Track key commodity prices, including spots, futures, and estimates clustered in relevant subgroups of metals and minerals.

ACCESS COMPANY AND INDUSTRY NEWS AND RESEARCH

Stay on top of Metals & Mining industry-specific news from StreetAccount's mining specialist team and create watchlists/alerts.

- Uncover relevant insights and generate investment ideas in unstructured data with our AI-powered document smart search tool
- Easily search for keywords and phrases such as “drill results” or “exploration drilling” across news stories, filings, research reports, press releases, transcripts, and more
- Leverage visuals to analyze results and further refine queries to get information quickly and efficiently

MONITOR M&A TRANSACTIONS AND CAPITAL RAISING

Track and observe all mining mergers and acquisition transactions as well as capital-raising activities for mining and exploration companies.

- Evaluate how mining and exploration companies raise capital in debt and equity markets over time
- Track a specific company's M&A activities, including corporate transactions as well as property acquisitions and dispositions
